

Junior Software Developer

VideoSmart Porto

About VideoSmart

VideoSmart is a multi-award-winning video technology company, specialising in personalised and interactive videos.

Our client base includes some of the largest companies in the UK, all using VideoSmart's services to achieve a range of marketing and servicing objectives.

Our team is an eclectic mix of tech geeks, data gurus, connoisseurs in creativity and pragmatic project managers.

Our goal? To improve customer communications using the power of video. With the help of endless cups of Nespresso, unlimited stashes of biscuits and our beloved ping pong table/football table, we are able to do just that.

We are looking for a backend focused **Junior Software Developer** to join our Porto based team, for the IEPF Internship Program ATIVAR.PT. You'll be working collaboratively in an agile environment with a group of talented developers. Your opinion matters and you'll be able to shape how we solve our next problem.

The Role

General Responsibilities.

- Delivering campaigns to our clients
 - these are big companies – most are Finance/Banking services
- Meeting campaign deadlines
- Work closely with all different Teams – Dev, UX Designer, Video and Client Manager Teams.

Requirements.

- Degree or Master Degree in a relevant field
- Some experience in C#
- You have a passion about Campaign metrics/results
- Understanding of JavaScript & HTML & CSS
- Excited about emerging web technologies
- Good understanding of SQL
- Precise attention to detail
- Good English communication skills

We offer.

- 12-month professional internship contract (IEFP Internship – ATIVAR.PT)
- Hybrid work facilities
- 25 days as annual leave
- Coffee break on us
- Team Building activities and Company Outings
- Free Parking

Think this could be the role for you? Waste no more time and email joinus@videosmart.com with your CV
